HUCK has built a reputation for ergonomically engineered tools that add to the productivity of any operation. That reputation is only enhanced by the introduction of the HUCK Model 2025 Pneudraulic Installation Tool. This high performance, ergonomic tool is designed for use with blind rivets and small two-piece fasteners, for both high speed production (to 35 fasteners/minute) and repair applications. Lightweight, reliable, and easy to use, these tools deliver a level of performance and ergonomics never before possible in a low cost pneudraulic tool.
**Choice of Models**

The 2025 is available in four versions for the best match of tool to application:
- The standard 2025 features a pintail deflector configuration
- The 2025L includes an extended piston for installing two-piece fasteners with a single stroke, eliminating the need for spindle extensions (Note: Special nose assembly required)
- The 2025V includes a vacuum assist pintail collection bottle
- The 2025LV combines both an extended piston and vacuum assist pintail collection bottle

**Key 2025 Features Include:**
- In-line piston for one-stroke installation
- Front wiper combined with POLY-SEAL for long tool life
- Less than 5.8 lbs. for ease of use
- Ergonomically designed hand grip
- 360° swivel air inlet connection provides the highest degree of tool freedom and reduces hose wear
- Plated piston rods for long life
- Noise level 75 dBA @90 psi

**High Performance Features**

The 2025 tools feature reliability, safety, and long, trouble-free life, while providing for an installation rate of 35 fasteners per minute. And operator productivity is increased by the tool’s ergonomic design, light weight and reduced noise levels (75 dBA). Operator productivity remains as high at the end of the shift as it was at the beginning. And like all HUCK pneumatic tools, the 2025 series delivers uniform strength and clamp force, with the highest power-to-weight ratios in its class.

**Specifications**

- Weight: 5.75 lbs.
- Required Air Pressure: 90-110 psi
- Air Consumption: 6 CFM based on 30 cycles per minute
- Hydraulic Fluid: Automatic Transmission Fluid DEXTRON III® or equivalent
- Stroke: 0.675 in.
- Capacity: 5290 lbs.

**Proven Reliability**

Ruggedness and dependability are standard features of every HUCK tool. These workhorse tools include such life-extending features as plated piston rods, a reduced number of moving parts, and durable metallic construction. Trust HUCK for the most efficient, versatile, and reliable tooling available — true Tools of Productivity™.

Tools of Productivity is a service mark of HUCK International, Inc. HUCK provides technical assistance regarding the use and application of HUCK fasteners and tooling.
