The Huck Truck Frame Repair Kit provides the installation tool and the portable power source a shop technician needs to pull the Huck fasteners most commonly used in heavy-truck frame repair. Complete the kit by ordering the optional nose assembly or assemblies for the fasteners employed in your operation.

The Truck Frame Repair Kit is a true Tool of Productivity. Available only from Huck or your Huck distributor.

Huck 586 Hydraulic Installation Tool

- Premium, production-quality tool
- 5,400 psi pull pressure (372.4 bar)
- 40,000 lbs. (177.9 kN) pull capacity
- Ergonomically designed for a comfortable, natural grip and smooth installation action
- Low-effort trigger action
- Installs fastener diameters up to 3/4 inch

Huck POWERIG® 940 Hydraulic Source

- High portability — weighs only 75 pounds (34 kgs)
- Powered by 115V or 220V AC
- Ruggedly constructed
- Includes quick-connect couplers for easy hook-ups
